

Professional Diploma in Early Childhood Learning

7 Months Programme

*Non-MQA Programme

About the Programme

This course gives an introduction to teaching methods in early childhood education in Malaysia and the international context. It examines the theoretical foundations from a developmental perspective addressing the children's social and moral development. The scope of study will include history, geography, economics, sociology, environmental studies and moral studies, mathematics, science and technology. The learning experiences will reflect the child's growing ability to understand concepts from a broader and a more complex perspective. The curriculum design will be approached from an integrated and anti-bias organization, with reference to the National Standard Preschool Curriculum (2010), reflecting the most meaningful way those young children can learn about themselves and others in the world.

Subjects Offered

- Foundations of Early Childhood Education: Early Learning and Environments
