WHERE PASSION MEETS COMPASSION

Pharmacy is the science concerning the discovery and development of therapeutic substances into medicines for use in disease prevention. Pharmacists use their unique knowledge of medicines and skills to provide care for patients, thus play an important role in the health care system.

Pharmacists compound and dispense medicines, provide health information advice, and manage diseases and medications. They also hold key responsibilities in pharmaceutical industry where there is consistent demand for pharmacy graduates in drug discovery and development, production, quality assurance, regulatory affairs and clinical research.

Due to the rapid growth of the health care system, the increasing elderly population and the booming pharmaceutical industry, there is an unprecedented demand for pharmacists today in various career settings.

“SEGi’s Pharmacy programme aims to integrate scientific, clinical and professional knowledge with soft skills, providing graduates with competency and skills to contribute effectively within the health care system. Students gain hands-on experience in different pharmacy settings throughout the 4 years, with built-in experiential placements in community and hospital pharmacy, as well as pharmaceutical industry.”

A HIGHLY INTEGRATED CURRICULUM

Our curriculum is designed and taught in an integrated manner throughout the duration of the programme to provide students with the scientific knowledge and skills in achieving competencies in the different discipline of pharmacy.

STUDENT-CENTERED LEARNING

The teaching approach shifts progressively from being teacher-centred to student-centred over the four years. A wide range of learning approaches are used to address the learning needs of individual students, and to foster the development of problem solving, critical thinking and analytical skills to become a lifelong learner.

FULLY EQUIPPED LABORATORIES

The laboratories in pharmaceutical chemistry, pharmaceuticals, biology/microbiology are equipped with high-tech, modern instruments. We also have clinical skills lab, mock pharmacy, aseptic unit and medical museum.

ACTIVE LEARNING SIMULATED ENVIRONMENT

Students get to experience innovative active learning to enhance their clinical knowledge and skills, and improve their confidence and communication skills in the simulation-based environment.
